- World Bank Pension

And many others...

PROGRAMME

17 March 2021 (all times IST)	
08:50	Welcome Remarks
09:00	Investment outlook: Private markets in 2021 and beyond <p>Although 2020 has been a challenging year due to the pandemic, Indian private equity has seen some positive and even record-breaking deals in certain sectors where growth has shone through. While this might help to jump start investments in 2021, certain sectors have been hit but the fundamentals of the India story mean the sectors that have seen a boost and are already staples of the domestic private markets players, like healthcare, ecommerce, tech and education, are strongly positioned for savvy investors to seize the moment. Our panel of private market experts will discuss how they view the current state of play in India, the areas they will be targeting for growth and the challenges the industry is facing in 2021 and beyond.</p> <ul style="list-style-type: none"> • What is the private markets outlook in each asset class? • Will the high levels of dry-powder supercharge deal-making in 2021? • What sectors are most attractive and how are they being accessed? • How will GPs source exits in 2021?
09:45	Q&A
10:00	Networking break
10:30	The Distressed landscape: Picking the winners <p>In the last few years distressed specialists and private equity players alike turned their eye to the India market as an appealing private credit opportunity. The pandemic has now firmly put the distressed investment opportunity in the spotlight and investors are increasingly clinching deals at fair valuations amid the economic turmoil caused by the pandemic. With many companies going bankrupt, the size of the distressed market is ever increasing, prompting investors to fill the gap and enter the asset class creating an opportunity for GPs and LPs that are willing and able to pivot their approach to distressed investing. Our expert panelists discuss the Indian credit environment and what the future holds for this promising sector.</p> <ul style="list-style-type: none"> • How big is the distressed investing opportunity in India? • What strategies are credit investors facing in managing these types of assets? • What is the LP appetite for credit exposure? • Which type of distressed investment will be the most attractive in 2021?
11:15	Q&A
11:30	Close

Why attend?

- **Discover** the outlook for private markets in India
- **Gain** unrivalled access to industry leading investors
- **Learn** how GPs will approach the next wave of investments
