## Why

### Achieve Perfect Vision Into the Infrastructure Finance Market

In order to remain a top infrastructure investor, lender, or advisor, firms need to digitally transform their business using predictive analytics powered by leading data. As competition intensifies, InfraLogic allows firms to eliminate blind spots and connect the dots before others to identify brownfield, greenfield, and refinancing opportunities personalized to their investment or business criteria.

## Who / What

- GP personas at firms that make equity investment in infrastructure assets
- MD and analyst personas at lenders looking to profile equity investors to ID new financing opportunities

## How

The solution combines 26 years of transactions data from Dealogic and investigative journalism from Inframation to bring unmatched analytics to help the Infrastructure community find opportunities even before they officially come to market.

## Product Use Cases

- Find new equity or debt opportunities even before they come to market
- Build custom deal pipelines to prioritize resources
- Map investors, funds, lenders, and advisors to originate new business
- See deals that match your top competitor's investment criteria
- Spot overall market trends to inform strategy
