

See the Bigger Picture

More companies, more insights, all connected in one place.
Powered by AI and backed by Moody's trusted data and analytics.

Get a holistic view of risk for the public and private companies you're analyzing.

We have tripled the corporate coverage in CreditView by adding a comprehensive view on over 12,000 entities that are not rated by Moody's Investors Service. Our expanded coverage gives you a holistic view of risk for the public and private companies you're analyzing.

Assess risk and gain insights from multiple angles, including financials, Moody's Analytics market-implied ratings and interactive scorecards, debt maturity, ownership structures, Moody's Investors Service sector research, and more – all backed by our trusted analytical frameworks, more than a century of expertise in risk and delivered through AI and cutting-edge technology.

Benefits

Save time in your credit analysis

Now you can analyze, compare and monitor your corporate entities in a single place

Get a holistic view of a company's credit profile

Assess risk from multiple perspectives with more of Moody's highest-quality data and analytics in one integrated solution

Facilitate and streamline your workflows

Quickly navigate the intuitive analytical tools, including easy-to-view peer comparison charts and interactive scorecards for benchmarking and scenario analysis

Coverage

The expanded coverage encompasses ~12,000 non-financial corporate entities across the US and Western Europe that are not rated by Moody's Investors Service.

Key Features

Financials

Save time in your analysis with timely financial statements and key ratios, standardized to Moody's Investors Service Chart of Accounts. Easily trace back to the original sourced data to help streamline your workflow and improve the accuracy of your financial analysis.

Peer Comparison

Identify leaders and laggards across peers - including names with a credit rating from Moody's Investors Service and without - and highlight areas that need further analysis with easy-to-view comparison charts.

Moody's Analytics

Interactive Scorecard Tool

Perform scenario analysis and generate credit risk profiles using Moody's Analytics interactive scorecard tool based on Moody's Investors Service rating methodologies and your qualitative inputs.

Debt Capital Structure & Maturity

Get a clear picture of a company's debt obligation structure and maturity schedule to enhance your understanding of credit risks and opportunities of a company.

Moody's Analytics

Probability of Default and Market-Implied Rating

Assess the probability of default and understand Moody's Analytics market-implied rating for companies not rated by Moody's Investors Service, by leveraging time-tested credit models to reliably assess the financial resilience of rated and unrated, public and private companies globally – with greater speed and accuracy.

Moody's Investors Service

Sector Research

Access in-depth insights and opinions on sector trends and macro research from Moody's Investors Service to understand the wider forces shaping your credit decisions.

Ownership Data

Gain insight into the ownership structure of companies to improve your understanding of a company's risk profile.
